News: 2012-03-21 [GoldWave v5.67 Released.](#)  
 News: 2011-09-07 [Beats/Minute Android App Released.](#)

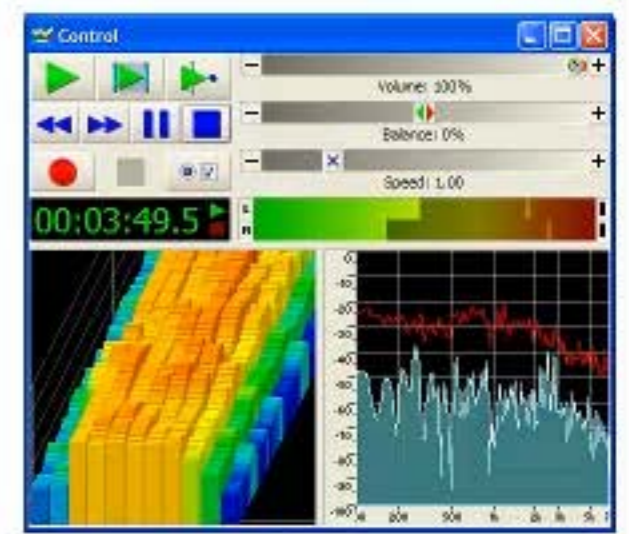

GoldWave is a highly rated, professional digital audio editor. It's fully loaded to do everything from the simplest recording and editing to the most sophisticated audio processing, restoration, enhancements, and conversions. It is easy to learn and use, so **get started now** by downloading the free, fully functional evaluation version!

**Play all your favourite songs** and view real-time visuals. Listen to the audio while fast-forwarding or rewinding. Change the playback speed to hear your music in a whole new way, or to learn a song by ear, or transcribe dictation or a lesson.

**Record any source your computer supports**, including microphone, line-in, and what-you-hear. Connect a turntable to record LPs, a cassette deck to record tapes, a receiver to record radio, or a microphone to record your own music, speeches, or reports. Use the timer to start recording at a certain day and time. Use level activated recording to continue and pause recording automatically whenever the signal is above or below a given level.

**Edit audio with all the basic commands** such as Cut, Copy, Paste, Trim, Replace, and Overwrite. GoldWave's fast virtual editing means you can slice, dice, and merge large audio files in seconds. Mix and Crossfade songs together with just a few clicks. Whip together audio for podcasts, Flash animations, radio spots, PowerPoint presentations, or music for dance programs, figure skating, gymnastics, and aerobics.

**Process dozens of different audio effects.** Adjust bass or treble with the Equalizer. Even out volume levels with Auto Gain. Easily fade in and out background music with Voice Over. Replace profanity with beeps or other

The screenshot shows the GoldWave application window. At the top is a menu bar with 'File', 'Edit', 'Effect', 'View', 'Tool', 'Options', 'Window', and 'Help'. Below the menu is a toolbar with various icons for file operations (New, Open, Save, Undo, Redo, Cut, Copy, Paste, P.New, Mix, Repl, Del), editing (Trim, Sel Vw, Sel All, Set), and playback (Play, Stop, Pause, Previous, Next). A digital display shows '00:00:00.0'. Below that is a color-coded waveform visualization. The main window displays 'sample.mp3' with a green waveform on a blue grid. The vertical axis ranges from -0.5 to 1.0. The horizontal axis shows time from 00:00:00 to 00:00:50. Below the waveform is a detailed view of the audio signal. At the bottom of the window, a table displays the current audio file's attributes:

Mono	1:01.492	0.000 to 1:01.492 (1:01.492)	0.000
Original	1:01.492	MPEG Audio Layer-3, 44100 Hz, 128 kbps, mono	

At the bottom of the window is where GoldWave displays the current audio file's attributes. Verify that these are the same as what you see on this screen. If they are different, continue with the remainder of the video

The screenshot shows a Windows desktop environment. The desktop background is blue with a green and yellow abstract design. A GoldWave icon is visible on the desktop. The taskbar at the bottom contains several icons, including the Start button, Internet Explorer, File Explorer, a media player, a folder, and GoldWave. The system tray on the right shows the time as 2:48 PM on 8/20/2012, along with icons for network, volume, and other background processes.
