To Burn a Data CD for Sonorous with Windows 7 Nel-Tech Labs, Inc. • 603.425.1096 • <u>Website</u> • <u>KnowledgeBase</u>

- Insert a writable CD into your CD burner drive
- When the "AutoPlay" dialog box pops up, click "Burn files to disc using Windows Explorer"

Note: if the **``AutoPlay**" dialog box does not pop up, click the **``Start**" **Start**" from your toolbar, click **``Computer**," then double-click your CD burner drive

	~
AutoPlay	<u> </u>
DVD/CD-RW Drive (D:)	
Always do this for blank CDs:	
Blank CD options	_
Burn an audio CD using Windows Media Player	
Burn files to disc using Windows Explorer	
View more AutoPlay options in Control Panel	

• In the "**Burn a Disc**" dialog box that pops up, type a name for the CD in the "**Disc title**" box (optional), click "**Like a USB flash drive**" then click "**Next**"

It might take several minutes for the disc to be formatted. When the format is complete, an empty disc folder opens

• Open the folder that contains the MP3 file(s) you want to burn & drag the files into the empty disc folder

Note: MP3 file must be Mono, with a recommended 128k Bit Rate (kbps), 44 KHz (44100 Hz) Sample Rate

- To select multiple files, press & hold the "Ctrl" key, then click on the files you want to burn
- As you drag files into the folder, they are copied automatically to the CD

• After copying the file(s), you might need to close the disc session

Note: Instead of "dragging & dropping" files, after formatting the CD, you can select the files you want to burn in Windows Explorer, right-click the selected file(s), point to "**Send to**," then click your disc burner drive
